EXAMINER'S AMENDMENT

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the paddles in claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Adam Stevens on Wednesday September 20, 2006.

The application has been amended as follows:

- A] Claims 4-6, 7-8 and 11-14 have been cancelled.
- B] In claim 1 line 12, "and" has been deleted and in line 13, "." has been replaced with -- wherein said material classifier ring prevents said asphalt material from passing said material classifier ring in said rotating drum until said asphalt material is smaller than a certain size and wherein said material classifier ring comprises a number of paddles with spaces between said paddles, said spaces determining the size of said asphalt material that is allowed to pass said material classifier ring.—
- C] In claim 9, "8" has been replaced with --1--.
- D] In claim 10, "9" has been replaced with --4--.
- E] In claim 15, "14" has been replaced with --1--.
